WORK EXPERIENCE

● CMS DEVELOPER | JANUARY 2026 – NOW

BEMBEX LAB

- Developed and maintained custom WordPress CMS websites, implementing client-specific functionality, responsive UI, integrations, and performance optimizations.
- Worked across multiple development platforms including Shopify, GoHighLevel (GHL), Squarespace, Webflow, Unbounce, and other website builders to deliver customized client solutions and automation workflows.
- Managed hosting, domains, website deployments, migrations, and platform configurations, while troubleshooting technical issues and ensuring smooth website operations for multiple client projects.

● AUTOMATION ASSOCIATE | JUNE 2025 – JANUARY 2026

CARPE DIEM TEAM

- Designed and implemented GoHighLevel (GHL) automations, workflows, funnels, and CRM processes to streamline lead management and client operations.
- Built advanced integrations using Make.com, n8n, Zapier, and APIs, connecting GHL with external platforms and automating complex business workflows.
- Developed and deployed n8n-based AI agent systems to automate lead qualification and follow-up processes, contributing to improved lead conversion and operational efficiency.

● FRONT END DEVELOPER | JUNE 2023 – JUNE 2025

Sourcecode

- Developed and maintained WordPress, Shopify, and custom web solutions, delivering responsive and client-focused websites.
- Managed end-to-end web development, including website customization, functionality development, performance optimization, and ongoing maintenance.
- Improved client online visibility and search rankings through technical, on-page, and off-page SEO strategies, including web
